User-friendly operating software
based on our proven web service

sySan
permanent condition monitoring

Simple and easy

Thanks to the user-friendly interface, the issuing of a card or ID becomes significantly easier and does not require any additional staff for support.

The ANA-U WebCard Management, which has been tried and tested for years, is a decentralized, service-oriented system for issuing cards. The current self-service version enables easy access to create ID cards without special knowledge and perfect photos helped by automatic face recognition.
