

edu.card

ID and proof of identity cards for scholars

The edu.card is a chip card standardized by the guidelines of the Federal Ministry, which applies to all Schools in Austria. It is a school service card that provides scholar data nationwide. As a certified supplier, ANA-U offers all of the systems required for the introduction of the edu.card for card production, connection to the school administration base, and photographer. Our software allows automatic photo allocation and is a web-based system for reordering cards.

Data protection

All original data remains in the schools administrative database. No data is stored centrally or managed privately. As a certified Federal Ministry distributor, ANA-U is compelled to adhere to strict data protective guidelines. Only data that is necessary to issue an ID card is transmitted and will be deleted after the completion of printing.

ANA-U provides a service to photographers, wishing to procure edu.cards, as well as printing the final product with the photos taken by non certified photographers.
