

Thermo Rewrite Cards

Whatever changes the rewritable card remains

Data such as the validity date, school class, name or title can change. But that doesn't mean the entire card need to be changed. With TRW cards you don't have to issue a new card. That protects the environment.

We supply all kinds of offset printed cards in a customized layout including a chip. The size of the TRW field is adapted to individual needs.

TRW field on ID card for students

Using Thermo Rewrite, the blue (optionally black) data can be read hundreds of times, deleted and printed with current information. Recommended for ID systems and personalized customer cards.
