

WEB CARD MANAGEMENT

The service-oriented complete system for Card personalization

The ANA-U Web Card Management is a decentralized, service-oriented system for issuing ID Cards. The web browser-based application can be integrated into any system and can be connected to any database. Capturing, scan and importing of photos is done automatically by face recognition.

- Web server and software in all printer models
- Web browser-based
- No installation needed for client
- Device operation/maintenance from remote Computer
- Tablet or Smartphone
- Capture, scan and import photos
- Automatic facial recognition
